EXPERIENCE

SIB Kampus Merdeka X Dicoding Batch 3, Dicoding Indonesia.   August 2022 – December 2022
Certified independent studied (SIB) dicoding cycle 3 was part of the merdeka campus program which aim to produced high-standard talent that met industry standards
Part-time, Facilitator
Led and assisted a cohort of 25 students in a class from the same learned path, though a weekly session.
- Provided consultative support to study together and support each other.
- Overall, provided a supportive learning environment that would lead to a high graduation rate among your students.

Bangkit Academy led by Google,
Tokopedia,Gojek & Traveloka at Bangkit Academy led by Google.   February 2022 – July 2022
A Bangkit Academy program aimed to demonstrate capabilities in problem-solving, tackle real-world problems with technology, teach how to manage a real-world project, and provide experience in real-world teamwork collaboration
Part-time, Facilitator
Led and assisted a cohort of 25 students in a class from the same learned path, though a weekly session.
- Provided consultative support to study together and support each other.
- Overall, provided a supportive learning environment that would lead to a high graduation rate among your students.

Product-Based Capstone Project at Bangkit Academy.   February 2021 – July 2021

Bangkit was an approved Kampus Merdeka-Study Independent program supported by the Ministry of Education, culture, Research and Technology Republic of Indonesia. This industry-led interdisciplinary, and immersive program was designed to produce high-caliber technical talent for world-class Indonesian technology companies and startups

<u>Summer Intern</u>, Machine Learning Development
Developed Machine Learning Model with Tensorflow

● Designed, developed and researched machine learning systems, models and schemes
● Analyzed appropriate data sets before performing data collection and data modeling
● Performed statistical analysis and using result to improve models
● Built machine learning systems and models
● Identified differences in data distribution that could affect model performance
● Visualized data for deeper insight
● Verified data quality

Automation Project Officer at Dicoding Indonesia   January 2023 – June 2023

Dicoding is present as a technology education platform that helps produce globally standardized digital talents. All for the purpose of accelerating Indonesia to become a leader in the field.

<u>Summer Intern</u>, Automation Project Officer
Make automation using appscript

● Project Initiation and Planning: Define project scope, objectives, timelines, and allocate resources.
● Automation Strategy: Develop and implement the automation strategy, including selecting the right tools and technologies.
● Project Coordination: Collaborate with cross-functional teams for successful project execution.
● Risk Management: Identify and mitigate project risks to stay within budget and schedule.
● Budget Control: Manage project budget and control costs for efficient resource use.
● Stakeholder Communication: Maintain effective communication with stakeholders, addressing concerns.
● Testing and Quality Assurance: Ensure automation solutions meet performance and quality standards.
● Documentation: Maintain project records to track progress and changes.
● Training and Knowledge Transfer: Provide training for teams to operate and maintain automation systems.

Capstone Project With Industry Partner at Generasi Gigih 3.0.   July 2023 – November 2023

The GIGIH Generation is designed by the Children of the Nation Can Foundation and GoTo as a solution for young Indonesian technology talents to participate in the rapidly growing technology industry.

<u>Summer Intern</u>, Mobile Engineering
Developed DDorocare Application

● Creating applications for mobile platforms using languages Kotlin.
● Ensuring that the application runs smoothly and efficiently on mobile devices with various specifications. This involves optimizing code and resource management.
● Involving the design of the user interface (UI) and user experience (UX) to make the application user-friendly and appealing.
● Integrating the application with various Application Programming Interfaces (APIs) to gain access to external data or services.
● Conducting security testing to protect user data and prevent security breaches in mobile applications.
● Performing routine maintenance, bug fixes, and updates to the functionality of the application as needed based on user feedback.
● Conducting comprehensive software testing to ensure that the application functions properly and meets quality standards.
● Keeping up with the latest advancements in mobile technology to ensure that the application remains relevant and utilizes cutting-edge features.

ADDITIONAL INFORMATION

- Highly proficient in the following technologies:
  - Operating Systems: Windows Server, Linux Server
  - Database: MySQL, SQL Server
  - Aplication Development and ProgrammingTecnologies: Java,Kotlin
  - Microsoft Office : Power Point, Microsoft Word and Microsoft Excel
- Top 50 Capstone Project in Bangkit Machine Learning Participant at Bangkit Academy led by Google,Tokopedia, Gojek, and Traveloka 2021
- In 2021 obtained Tensorflow certification from Google Developer.
- In April 2021 University Innovation Fellows, Institut Teknologi Harapan Bangsa; Created student innovation spaces, started entrepreneurship organizations, facilitated experiential workshops, worked with faculty and administrators to develop new courses, and much more.
- Score TOEFL : 550 (June, 2022)
